

TANDEMBOX antaro

Rectangular rail with a clear design throughout the whole range

Minimalist design. Proven technology. TANDEMBOX antaro

The TANDEMBOX drawer system has been impressing furniture users and furniture manufacturers with its proven technology for many years now. We have now developed TANDEMBOX antaro, a new programme line with new design options. TANDEMBOX antaro has a clear style – whether it's open with a gallery or as a closed drawer with a side design element.

All components are colour-coordinated. Minimalist design meets proven technology. That is TANDEMBOX antaro.

The design – Four colours. One style

Minimalist style with a customised colour concept

The minimalist design of TANDEMBOX antaro has a consistently clear form and colouring. All nylon components are coordinated to the respective drawer side colour. The colour and material programme includes three steel variants: Silk white, white aluminium and terra black as well as stainless steel.

The programme – Living room re-invented

TANDEMBOX antaro offers a complete programme for pull-outs and drawers. Whether in the kitchen, bathroom or living area – all applications are possible with TANDEMBOX antaro.

Nominal lengths	27	0 – 650 mm
Cabinet widths	275	– 1.200 mm
	N	(68.5 mm)
Drawer side heights	M	(83.6 mm)
	K	(115.6 mm)

Design elements – Use to attain a unique style

By using design elements you will be able to fully enclose the drawer & simultaneously present a style statement. The elements you add can reflect your design aspirations. You can choose from Blum design elements (glass or metal). There are of course, many other possibilities (eg wood) you could use to express your ideas.

Glass design elements – Available Autumn 2012

Clear glass

Frosted glass

Metal design elements in three drawer side colours – Available March 2013

Silk white

Terra black

White aluminium (RAL 9006)

The programme – Inner dividing system

Practical organisation

The ORGA-LINE inner dividing system is not only practical, but also matches the shape and colour scheme of TANDEMBOX antaro. Storage items are perfectly organised using flexible longside and cross dividers*. Stainless steel drip trays in the drawers provide high-quality organisation. Very practical: The containers are easy to remove and are dishwasher safe.

See the ORGA-LINE brochure for more information about this practical organisational tool.

* Available March 2013

Assembly – Simple and tool-free

Back gallery rails clip on easily.

Front tilt adjustment

Design element assembly is very easy. Simply slide in and connect to the back locking piece.

The TANDEMBOX program line is based on the established cabinet profile. This is a real advantage especially when you are assembling different programme lines. The drilling and cutting dimensions remain the same and familiar assembly devices support efficient assembly.

View assembly video

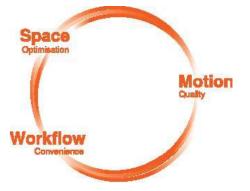

DYNAMIC SPACE - Ideas from Blum for practical kitchens

The three important features of a practical kitchen include good workflows, enough storage space and high ease of use – at Blum, this means: workflow, space and motion.

With DYNAMIC SPACE, we offer helpful ideas, suggestions and solutions for making today's kitchen even more practical.

Workflow - Give yourself easy access

Thanks to full extension drawers & pull-outs, even those items in the farthest corner are visible and easy to reach. The right ORGA-LINE inner dividing system provides additional organisation and overview. In this way, TANDEMBOX antaro supports simple workflows in the kitchen.

Space - Optimal cabinet utilisation with TANDEMBOX antaro

TANDEMBOX antaro can also be used as a an enclosed drawer with glass or metal design elements. Products are easier to stack, thus creating up to 55% more storage space. You can also achieve special solutions such as the Blum sink pull-out with TANDEMBOX antaro, gaining additional storage space from previously unused areas.

Enhanced user convenience and quality of motion

Motion - The BLUMOTION function is integrated into TANDEMBOX cabinet profiles. Thus pull-outs always close silently and effortlessly regardless of how much force is used for closing.

TANDEMBOX antaro can also be equipped with the SERVO-DRIVE electrical opening support system. A light touch on the front is enough and pull-outs open as if by themselves.

Fascinating action when opening and closing

TANDEMBOX antaro can be used with all Blum motion technologies:

BLUMOTION

With BLUMOTION, pull-outs close silently and effort-lessly. It doesn't matter how much force is used to close drawers and pull-outs or how heavily laden they are.

SERVO-DRIVE

A light touch on a handle-less front or a light pull of the handle – that's all it takes to open drawers and pull-outs with the SERVO-DRIVE electrical motion support system:

And you always have integrated BLUMOTION.

TIP-ON

Our mechanical opening support system TIP-ON offers practical opening comfort: Handle-less pull-outs, doors and lift systems will open at a single touch. The pull-out closes with a light press.

Top-quality motion throughout the kitchen

Along with pull-outs, lift systems can also be equipped with this comfort of motion.

For lift systems: BLUMOTION, SERVO-DRIVE, TIP-ON For doors: BLUMOTION, TIP-ON

Perfecting motion

Blum's fittings solutions are designed to make opening and closing furniture a mesmerising experience. That's why we make every effort to perfect the motion of our lift, hinge, box and runner systems.

DYNAMIC SPACE

Blum products help to optimise workflows, gain storage space and offer a high level of comfort – making kitchens more practical.

Blum in Austria and around the world

Over 5000 employees support us on our quest for perfect motion. Our fittings are manufactured at ten plants. Seven are in Austria, the remaining are in the USA, Brazil and Poland. Thanks to international subsidiaries and sales agencies, Blum is on site to serve its customers all over the world.

Global customer benefits

From furniture manufacturer to user: Each should profit from the advantages of Blum products.

Top quality

Blum products have been developed for everyday kitchen use and are a pleasure to use a furniture lifetime.

innovations

We want our fittings solutions to be innovative and make everyday kitchen use easier. That's why our developments are based on findings from requirements research and input from our customers.

Environment

Blum strives to minimise its environmental impact. We use environmentallyfriendly processes, use raw materials intelligently and save energy wherever we can.

1952

The first product

Studs are attached to horseshoes to stop horses slipping.

1958

Début in the furniture industry

The ANUBA hinge is Blum's first furniture fitting.

1964

Production start

Blum produces concealed furniture hinges.

74

1966

Roller runners

Blum starts to produce roller runners.

Assembly technology

1985

CLIP hinges can be mounted without tools thanks to CLIP technology.

1987

Box systems

Blum's first box system goes into production with METABOX.

2001

Soft-close system

BLUMOTION ensures that furniture closes softly and effortlessly.

2005

Lift systems

AVENTOS lift systems are presented for the first time

2007

Electrical opening support

SERVO-DRIVE has received numerous awards for design and function.

2011

Runner systems

With MOVENTO, a new generation of runner systems was born.
