MERIVOBX

Let's create

www.blum.com

Let's create – The box platform for your ideas

MERIVOBX is based on a platform concept so you can create a broad range of drawers and pull-outs with just a few components – and all with the same easy assembly process. This simplifies production processes and increases efficiency.

Drawer M
 Drawer side height M is a true all-rounder – as a drawer, but also as a base for all high fronted pull-out options.

MERIVOBX modular with gallery
 The high fronted pull-out option with a gallery is eye catching and a top quality, entry-level solution.

MERIVOBX modular with BOXCOVER
 Glass design elements capture the light and create a classy impression.

MERIVOBX modular with BOXCAP
 Experts consistently opt for metal: it accentuates the clear cut design.

 Our site in the USA is certified to ISO 9001.
 Our site in Brazil is certified to ISO 9001 and ISO 14001.

Platform

It takes just a few components to create your own extensive range. And you can make furniture manufacturing even more efficient at the same time. Diverse and yet simple.

Cabinet profile

The cabinet profile forms the basis of the platform: you can use the same fixing position (height and depth) for all applications – be it with BLUMOTION, SERVO-DRIVE or TIP-ON BLUMOTION, with side stabilisers or for inner drawers.

Front

Fronts and front pieces are always manufactured and assembled in the same way, facilitating furniture manufacturing.

Drawer side

Different possibilities for combining drawer sides – distinctive look thanks to the characteristic design line.

Design

MERIVOBX boasts straight lines and a striking look. Create your own diverse and unmistakable range of furniture! Modern minimalism meets distinctive design.

Smooth transitions

For virtually seamless pull-outs.

Exposed metal parts

Metal components and a coordinated colour scheme create a top quality look.

Distinctive drawer side design

The slim drawer side has a distinctive design line that creates exciting light reflections.

Branding element

Add your own branding to the drawer side – simply slide on the branding element for consistent positioning.

Straight on the inside with flush cover cap

The clear cut design on the inside is rounded off by a flush cover cap. AMBIA-LINE beautifully organises interiors even with cover caps in place.

Functionality

The newly developed cabinet profile concept delivers extremely smooth running action and high load bearing capacity coupled with a feather-light glide and enhanced stability.

High front stability

The front attachment is extremely stable. No additional stabiliser is needed even when implementing high cabinet fronts.

Pull-out stop

Secure connection between cabinet profile and drawer.

Synchronised feather-light glide

The new box system is characterised by a smooth opening and closing action.

Vertical stability and full load bearing capacity

The box system is exceptionally stable thanks to the unique L shape of the cabinet profile. What is more, it has a high dynamic carrying capacity of 40 or 70 kg.

Stable front position

No matter whether empty or fully laden. Once adjusted, the gap layout will remain aligned to create a harmonious look.

Interface for optional components

Equip MERIVOBX with motion technologies and side stabilisers to suit your needs.

Assembly

A well-thought-out concept. No matter which model you opt for, assembly is always simple and adjustment always the same. It is extremely easy to achieve precise results.

Fast and reliable assembly and removal of fronts

The holding position allows you to insert fronts with ease (even if a pull-out is already in place). And makes it easy to remove very wide fronts, even alone.
