High quality ORGA-LINE sets with dishwasher safe, stainless steel compartments provide proper organisation for your cutlery. The individual cutlery containers can be laid out to suit your requirements. They are removable so they are easy to clean. Cutlery inserts are practical for buffets and garden parties.

Cutlery inserts in your Non Consumables

The Non-consumables zone is the largest storage zone in the kitchen. It alone holds one third of all storage items such as cutlery, crockery, glasses, plastic containers, electric whisks etc. ORGA-LINE cutlery inserts are used to properly organise your cutlery inside your non-consumable cabinets.

Cutlery inserts in Cooking zone

Cooking utensils that are used on a regular basis are best kept near the hob. The ORGA-LINE inner dividing system keeps all storage items well-organised. This way, everything is close to hand right where it is needed.
