

TANDEM plus BLUMOTION for 50 kg

Stable & consistent

PRODUCT
MEMO

With optimised sag values

Now an even more stable runner provides optimised sag values for TANDEM, our proven runner system for wooden drawers and pull-outs. You can always depend on it even when furniture is near to the floor or with heavily-laden pull-outs.

Perfect motion when opening and closing

- Smooth running action even with heavy load
- Integrated BLUMOTION function for silent and effortless closing
- Handle-less furniture can be accommodated for TANDEM runners are fully compatible with SERVO-DRIVE (our electrical opening support system)

Additional plus points

- The same dimensions and drawer sizes as with the existing TANDEM programme
- Existing assembly devices and drilling templates can continue to be used

All round ease of use

Thanks to the integrated BLUMOTION, you can always expect a smooth-running action, and silent closing with TANDEM plus BLUMOTION for 50 kg. For an inspiring opening effect, SERVO-DRIVE – our electrical opening support system, can also be used.

High stability to maximise design possibilities

Even when the gap is critical – the TANDEM runner for 50 kg keeps its promise. This opens up entirely new design possibilities, especially when the drawer front is near to the floor.

Wide pull-outs offer lots of storage spaces. With TANDEM plus BLUMOTION for 50 kg, wooden pull-outs have smooth running action even under heavy loads.

The optimised runner in TANDEM plus BLUMOTION for 50 kg demonstrates impressive stability.
